7 issues

Proyecto-python-acm-master/.....

Refactor this function to reduce its Cognitive Complexity from 17 to the 15 allowed.

10 locations

Replace the unused local variable "status" with "_".

1 location

Replace the unused local variable "result" with "_".

Proyecto-python-acm-master/.....

Refactor this function to reduce its Cognitive Complexity from 33 to the 15 allowed.

16 locations

Replace the unused local variable "nombre" with "_".

Proyecto-python-acm-master/.....

Replace this map call with a comprehension.

Rename this local variable "correosLimpio" to match the regular expression ^[_a-z][a-z0-9_]*$.

7 of 7 shown

Replace this map call with a comprehension.

Generators and comprehensions should be preferred over the usage of "map" and "lambda" when creating collection **python:S7505**

Line affected: **L35** ◦ Effort: **5min** ◦ Introduced: **27 minutes ago**

Software qualities impacted

Maintainability Low
